load.UP

Use the load.UP to reload money onto your credit account

At the automatic reloading machine load.UP users identify themselves via their RFID card, their magnetic card or their barcode and can then easily reload money onto their credit account. Identify yourself, pay in the money – Done.

You can either insert cash in the form of coins or banknotes, or reload your credit balance via credit card.

Using the automatic reloading machine is simple and intuitive via the 5.7" touchscreen.

The load.UP automatic reloading machine is sturdily made and is therefore ideal for heavy use in public places

Extension module

The optional extension module also permits the issue of new and nonpersonalised cards for guest use.

The card can store up to 200 new account cards for the issue of new cards, magnetic cards and cards with barcode. The automatic reloading machine is ideally suited for the issue of guest cards.

The addition of a SmartHopper permits the owner of a guest card to payout their account balance when they are finished.

Compatibility

You can use load.UP to reload credit accounts for all printing and copying cost accounting systems in common use:

• UniPrint
• PaperCut
• Equitrac Express
• Ysoft SafeQ
• Comprise
• PrintSafe
• PCounter
• Q PILOT®

AUTOMATIC RELOADING MACHINES

Authentication via the user's card account number or user name/password and reload the credit account

Banknotes or coins only

The load.UP can have either coin or banknote acceptors to reload the credit account.

•

Reliable banknote or coin verification
• Capacity approx. 500 coins (depending on the value of the coins)
• Select the coin values you wish to accept
• Capacity 400 banknotes
• Block any note values you don't wish to accept
Users can choose to print a receipt via the built in printer

With coins and banknotes

The version for coins and banknotes accepts cash to reload the credit account.

• Reliable coin and banknote verification
• Capacity 400 banknotes / approx. 500 coins
• Select the coin values you wish to accept
• Block any note values you don't wish to accept
• Optional issue of receipt via built in printer

With credit card terminal

The version with a credit card terminal reloads the credit account via the credit card.

• Credit card terminal for various countries and currencies
• Combination of credit card terminal and coin acceptance or banknote verification also available
• Issue of receipt via built in printer
• The credit card option can be added to either the coin only or banknote only machine configuration

AUTOMATIC RELOADING MACHINES

Alternative authentication via barcode or magnetic card

with barcode scanner
and extension module*

For all cards and systems

The load.UP automatic reloading machine can also be fitted out to scan barcodes or read magnetic cards.
Users identify themselves with their barcode or their magnetic card and can then reload money onto their credit account.
The barcode scanner is designed to read all types of barcode in common use

Some applications permit users to log in without a card, they can identify themselves by typing their personal account number or PIN onto the touchscreen.
